Which route to take?

# Manipulation or Intelligent Assistance?

- The interface of **how to present intelligent assistance** to the user is critical for success
- “Users don’t want to be told what to do, they want to choose”
  - Version 1:
    - “take the train at 12:17 from platform 6”
  - Version 2:
    - “which do you want to take? train at 12:17 from platform 6 (takes 45 minutes) or bus at 12:15 from platform 3 (takes 50 minutes, is unreliable)”
- Intelligent assistance is **not perfect** (and will not be for a long time), and **this can be hidden in the user interface**

You cannot NOT  
manipulate  
people's actions!

# Then End of Serendipity No Randomness anymore!

## Who do you trust to decide ...

- ...what movies you watch? (and eventually like)
- ...who you are sitting next to on the plane?
- ...which way you walk?
- ...who is in the same restaurant as you?
- ...which flat you buy?
- ...
- ...whom you marry?

Albrecht Schmidt. 2021. The End of Serendipity: Will Artificial Intelligence Remove Chance and Choice in Everyday Life? CHIItaly 2021: 14th Biannual Conference of the Italian SIGCHI Chapter (CHIItaly '21), July 11–13, 2021, Bolzano, Italy. ACM, New York, NY, USA, 4 pages.

What can Humans do  
better than  
Computers/AI?

Goal:

Design Human-machine systems outperform  
humans as well as machines

# What do Humans need?

# Short Term vs. Long Term

- UX is really good at short term UX
  - Great experience for using the app (over a day)
- Long term UX (physical and mental health) is not in focus
  - Seeing the results of one's work – making digital work results visible (that you can be proud of your work)
  - (personal) communication that create relationships and reduces stress
  - Working outdoors not in an office – even for office work
  - More movement – not sitting at a desk all day long

Luke Haliburton and Albrecht Schmidt. 2020. *Technologies for healthy work*.  
*interactions* 27, 3 (May - June 2020), 64–66. DOI:<https://doi.org/10.1145/3386391>
